Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Inventorship

1. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Jorach et al (6,505,601).

Jorach et al teach a single and multiple fuel injections phase forming an ignitable homogeneous mixture for a diesel engine.

3. Claims 1-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Kurtz et al (6,863,058).

Kurtz et al teach a method for controlling a diesel engine comprising the steps of selecting the first fueling mode where only a single fuel injection is provided, a second fueling mode where a first and second fuel injections are provided to the cylinder forming a homogeneous mixture.

4. Claims 13-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Marriott et al (6,668,789).

Marriott et al teach a diesel engine having an initial fuel charge injected and ignited during the compression stroke and then follow with subsequent injections spaces over time to maintain a controlled combustion rate.

5. Claims 13-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Wright et al (6,684,852).

Wright et al teach a first fuel injection with the intake air to provide a premixed charge, a second fuel injection into the combustion chamber after onset of ignition of the premixed charge in the combustion chamber.
